

Disaster Preparation and Management.

All you need to know.

As per latest scientific news from UN Climate and Bio Diversity Conferences, the planet is at the brink of collapse. Such a disaster can disrupt essential services such as water and food supplies, electricity, healthcare, sewage/garbage removal, transportation and communications. We are all aware about the time we are living in. So, it makes sense to be prepared mentally and physically as best as possible.

Be Prepared, Recover, Respond and Help

Brahma Kumaris Disaster Preparation and Management

- Prepare a plan and allocate funds
- Create provisions and supplies
- Be Ready - Be Steady - Stay Calm

Over the years many BKs have carried commendable work in compiling lists and documents to guide best in case of disaster. Lots has been done in Spanish language. You will find here some documents and list for your guidance. However, this compilation is only brief and you must adapt it according to the country and location you live in.

Please send us your feedback and improvements to environment@brahmakumaris.org

We also recommend that you Google your local civil protection authorities and download their brochures and information. Recently, in Germany, Sweden and Norway, those governments have issued brochures for emergencies.

Please also find some links to some useful Websites.
