

## Brahma Kumaris Environment Initiative

# CO<sup>2</sup> Travel Compensation for Brahma Kumaris

All forms of travels, especially by air, are among the biggest emitters of CO<sup>2</sup>. With one international flight we exceed our annual carbon footprint. In order to protect our planet, it is advisable to travel less - go by train and bus instead of car and plane.

If travel or flying is required, you now have the chance to compensate for your CO<sup>2</sup> emission by contributing 3-5 % of your yearly travel budget towards a dedicated BK travel compensation fund. These funds will be used by Brahma Kumaris for solar and green projects in order to compensate for your travel emission.

### Start Now :

- Reduce your personal travel CO<sup>2</sup> footprint
- Use environmentally friendly ways to travel
- Compensate for your CO<sup>2</sup> emission by donating towards the compensation fund
- Sign up and share your experiences
