TUESDAY 18 JUNE
19:00

The Change Maker - Shifting Mindset and Lifestyle

Brahma Kumaris Centre, Bischoffsheimlaan 39
1000 Brussels (Metro: Madou / Botanique)

Join us for an interactive evening to explore the shifts taking place in our world today. We work hard to meet the challenges of climate change in an increasingly polarized world. How we can achieve a more peaceful and sustainable world community.

As EU leaders meet during EUSEW - Energy Policy Conference, it is critical that civil society leaders gather and address the future role of each one and take responsibility as part of the whole human family.

Sonja Ohlsson

In 2009, Sonja Ohlsson was instrumental in developing the Brahma Kumaris Environmental initiative in order to meet the need for a higher environmental awareness within the international BK community, and also to add the inner dimension to discussions at the UN Climate Change conferences.

Golo Pilz

From 2010 - 17, Golo has been coordinating the design and construction of "India One", a 1MW solar thermal power plant at the Shantivan Campus of the Brahma Kumaris / WRST. This advanced power plant, based on parabolic dishes, features thermal storage for continuous operation, generates heat and power, and is a landmark in the future Indian renewable energy scenario. "India One" is managed by WRST and partly funded by the Indian Ministry of New and Renewable Energy Sources (MNRE) and the German Ministry for Environment, Nature Conservation and Nuclear Safety (BMUB).
