

UN Climate Change Conference 2014 Lima, Peru COP20/CMP10

Ethics at the Heart of Climate Change

Solutions to climate change involve understanding the inherent and instrumental value of human and non-human worlds. The ethical foundation within the climate conversation contrasts the current economic paradigm. Sustainable changes in personal lifestyles and government policies require ethical choices.

Speakers:

Renate Christ, PhD, Secretary of the IPCC

John Crowley, Chief of the Section Research, Policy and Foresight, UNESCO

Curtis FJ Doebbler, PhD, Visiting Professor of Law at Webster University Geneva
