

## Green Day in Madhuban - 1<sup>st</sup> March 2019 Gyan Sarovar

In Madhuban, the Green Day dedicated to the environment has now become an annual event for double foreigners.

Many activities took place to refine our relationship

with Mother Earth. The day began with a silent walk guided by David.

From 9 - 11am, the participants could choose between four green conversations:

1. Serving the Elements with Luciana from Brazil.

2. Yoga and the creation of the golden age with Golo.

3. Presentation on Yogic farming with Raju Bhai and Sumanth from the Rural Wing

4. Nature, Art and Healing – A Creative Workshop with Sonja.

In the afternoon Sister Jayanti and Golo were interviewed by Sonja on **Planetary Consciousness** and the creation of the Golden Age. You can listen to or view the interview on <http://jewels.brahmakumaris.org/>

The interview was about Planetary Consciousness - what is it exactly? Is it just something extra we need to learn, or can we just practice soul consciousness and that's it?

Which attitude or power would you advise BK's to practice for a more sustainable living?

What is the main blockage or resistance in sustainable living for BK's?

Are we caught up in the Confluence Age and service too much? A lot of capacity is used to administer a confluence-aged institution and life. What role does the golden age play in your spiritual effort?

Regarding the creation of golden age – is it enough to be purified by Baba and study our spiritual knowledge, or should one actively create the golden age? What exactly do you do on this topic?

What role does visualization play? Do you do it and how?

The Green Day ended with a great outdoor Peace Concert and Meditation in Dadi Janki Park. David, Ken, Alex and others played free style for an audience of approx 500 in the sunset.
